

Manlift Operator Certification Training Workbook

Manlift Training done right!

OSHA required safety training in a convenient Workbook. Employee driven - meaning that if you give a copy to the employee he can complete the scenario exercise within, take the test in the back and then must get a Supervisor to observe and document his hands-on skills. The following topics are addressed;

Safety Icons

Introduction and Accident Statistics

Scenarios

Types of Manlifts

Surfaces and Areas of Operation

Operators Manual and controls

Inspecting the Manlift

Fuels

Rated capacities

Driving Skills – Steering Types

Manlift Operating

Emergency Response

Summary

Tests and hands-on skills test can be administered and graded by Supervisors, making this a self-perpetuating course. Supervisors can even issue certification cards and/or hard hat stickers.

Fully
Illustrated

Kit comes with 10 Workbooks, and a Master (Answers) copy that contains 10 Operator Observation Worksheets, a grade log and 10 certification Cards.

To Order

There is a downloadable Fax Order Form available at www.GraphicSafety.com

\$240 per kit

Classroom time is not necessary, therefore significantly reducing loss productivity (and associated costs) because each employee can complete the workbook and then individually be hands-on certified.
